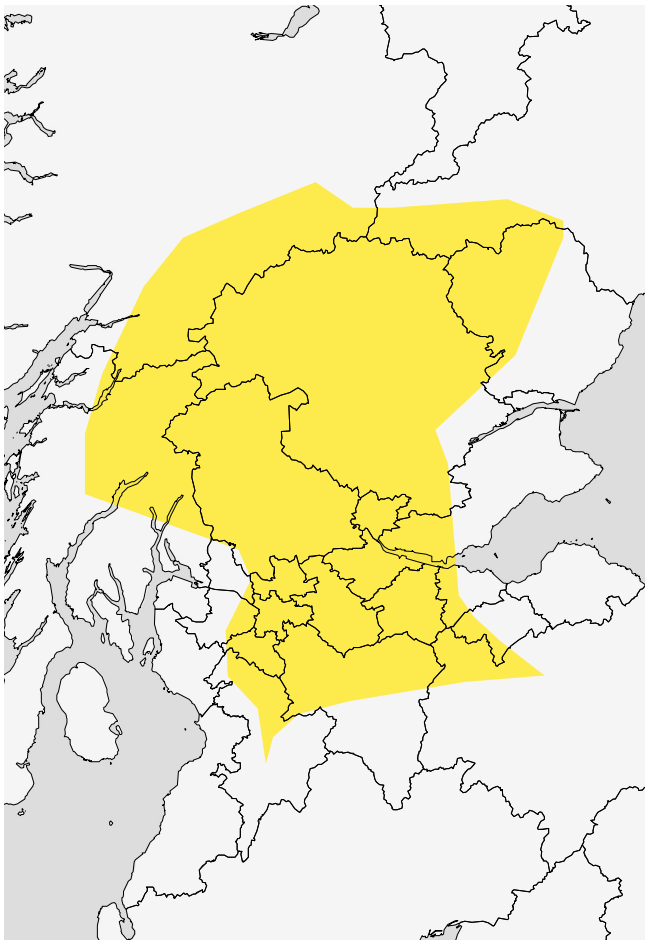
Yellow warning
Ice

Between
21:00 Fri 16 Dec 2022 and
11:00 Sat 17 Dec 2022



Earlier snowfall will freeze, leading to widespread icy conditions overnight and early Saturday and likely continued travel disruption.

What to expect

- Icy stretches on many untreated roads, pavements and cycle paths making accidents and injuries more likely
- Frozen snow and slush might make for very difficult conditions on some less busy roads, pavements and cycle paths

Further details

A lot of areas will have seen heavy sleet or snow during Friday. As any remaining snow dies out tonight, temperatures (although generally not quite as low as recent nights) will fall sufficiently to give fairly widespread icy surfaces, or frozen snowfall. This will lead to hazardous conditions on some roads and pavements, especially untreated or uncleared ones.

High likelihood of low impacts

Issued at 12:51 Fri 16 Dec, 2022
